Congratulations! Five College of Business Faculty Members Ranked Among the World's Top 2% Scientists, with Two Honored in Both "Career-long" and "Single-year" Categories

Released on October 7, 2026, the latest edition of the "World’ s Top 2% Scientists" list—compiled by a research team at Stanford University in collaboration with Elsevier—features both the "Career-long Scientific Impact Ranking" and the "Single-year Scientific Impact Ranking." A total of 9 faculty members from our university made the list, 5 of whom are from the College of Business. Their research fields span "Economics & Business" and "Information & Communication Technologies," highlighting the College's outstanding research achievements and international academic influence.

Among the honored faculty members from the College of Business, Distinguished Professor & Vice President Yu-Shan Chen and Distinguished Professor Kun-Huang Tsai were selected for both the "Career-long" and "Single-year" Scientific Impact Rankings, receiving dual

recognition. Additionally, Distinguished Professor & Director of the Computer Center Chih-Chien Wang (Graduate Institute of Information Management) was newly selected for the "Career-long Scientific Impact Ranking," reflecting his long-term dedication to the field of information and communication technologies. Professor Jung-Kuei Hsieh (Department of Business Administration) was newly selected for the "Single-year Scientific Impact Ranking," affirming his academic contributions to business and economics. Distinguished Professor Chi-Chun Cheng (Department of Business Administration) was also selected for the "Single-year Scientific Impact Ranking," demonstrating his continuous accumulation of research momentum.

Based on data from the Scopus citation and abstract database as of August 1, 2026, this evaluation tallies career-long data through the end of 2025, as well as citation impact for the single calendar year of 2025. According to the Science-Metrix classification system, global scientists are divided into 20 main fields and 174 sub-fields. Rankings are based on standardized citation metrics, comprehensively evaluating total citations, the h-index, co-authorship-adjusted hm-index, citation performance across different authorship positions, and a composite indicator (c-score). The objective is to objectively reflect scholars' profound substantive research impact rather than merely total publication volume.

Our College's Honored Faculty Members:

【Career-long Scientific Impact Ranking】

- **Yu-Shan Chen** – Distinguished Professor & Vice President (Department of Business Administration) / Research Field: Economics & Business (Dual Rankings)
- **Kun-Huang Tsai** – Distinguished Professor (Department of Business Administration) / Research Field: Economics & Business (Dual Rankings)
- **Chih-Chien Wang** – Distinguished Professor & Director of the Computer Center (Graduate Institute of Information Management) / Research Field: Information & Communication Technologies (Newly Ranked)

【Single-year Scientific Impact Ranking】

- **Yu-Shan Chen** – Distinguished Professor & Vice President (Department of Business Administration) / Research Field: Economics & Business (Dual Rankings)
- **Kun-Huang Tsai** – Distinguished Professor (Department of Business Administration) / Research Field: Economics & Business (Dual Rankings)
- **Chi-Chun Cheng** – Distinguished Professor (Department of Business Administration) / Research Field: Economics & Business
- **Jung-Kuei Hsieh** – Professor (Department of Business Administration) / Research Field: Economics & Business (Newly Ranked)
